

# AVOID THE PITFALLS

## YOUR AI SOLUTIONS PROVIDER CHOICE MATTERS

**cloudfactory**

# Vs

**Other AI Solutions Providers:**

Flexible AI data platform; easy to use, even for complex AI projects.

**Ease of Use**

Complex platforms; require extensive training and experience.

Advanced data and model capabilities across the full AI lifecycle.

**Capabilities**

Limited capabilities; may focus on specific AI lifecycle segments only.

Transparent, predictable pricing with no hidden costs.

**Pricing**

Complex, rigid pricing models; difficult to navigate and adjust.

Skilled dedicated teams ensure high-quality AI data and model oversight.

**Team**

Challenges in sourcing specialized skills; inconsistent quality workforce.

Expert AI solutions consultants tailor solutions for your specific needs.

**Expertise**

Limited personalized consultancy; focus on technical support over strategic advice.

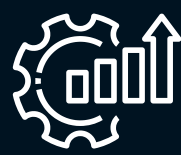

Exceptional data accuracy for reliable model training and performance.

**Data Accuracy**

Inconsistent data accuracy; impacts overall model performance.

Supports you into production and ensures real-world performance.

**Inference Centric**

Stops at providing training data for R&D.

Outstanding NPS of 75 demonstrates client satisfaction.

**Client Satisfaction**

Lower client satisfaction; affects reputation and client retention.

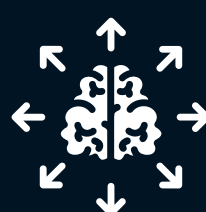

Clients retain full ownership of data and IP.

**Data Ownership**

Unclear data ownership and IP rights; raises serious security risks.

Investment and support for multi-modal AI models (GenAI, etc.), ensuring comprehensive solution capabilities.

**AI Modalities**

Limited focus on specific model types (i.e. GenAI only); lack of expertise in certain key areas.

**CloudFactory is the right choice as your trusted AI partner on every front.**
