

DATA ANNOTATION SOLUTION

ACCELERATE YOUR TIME TO VALUE WITH TURNKEY DATA ANNOTATION

Our Data Annotation Solution reduces complexity and gives you a faster path to high-quality data labeling. We bundle a professionally managed workforce with a best-in-class annotation platform for one inclusive price so you can:

- ✓ Scale fast with our trained, experienced, and managed team of data analysts that can be ready to start your project in as little as one week;
- ✓ Remove the expense and hassle of directly managing an annotation workforce and a complicated tech stack
- ✓ Streamline purchasing by integrating a data annotation platform and workforce into a single, monthly subscription service that can quickly scale with your needs.

We can scale your annotation process quickly, with our fully managed teams and AI-powered tools to improve speed and quality.

Why Choose CloudFactory?

Extend Your Team

Our vetted, managed teams have served hundreds of clients across thousands of use cases that range from simple to complex.

Quality At Scale

Our proven processes securely and quickly deliver accurate data and are designed to scale and change with your needs.

Subscription-based Terms

Flexible contract terms and pricing help you get started quickly and scale up and down as needed with no long-term lock-in.

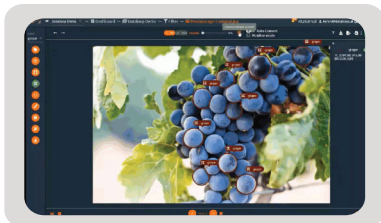

TURNKEY DATA ANNOTATION FOR COMPUTER VISION

An annotation solution that's flexible, consumable, and managed end-to-end for almost any CV use case

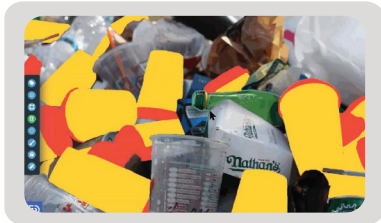

PROFESSIONALLY MANAGED WORKFORCE

- Data analysts vetted for skill, character and pre-trained on annotation platform and use cases
- Dedicated project management and client success teams
- Real-time visibility to analyst task completion and performance

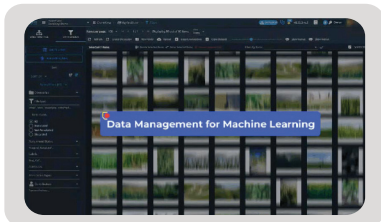

COMPREHENSIVE ANNOTATION PLATFORM

- Pixel-level accuracy at scale, with classification, detection, segmentation
- Keypoint annotation tools that enable fast and accurate data labeling for any CV use case
- Flexibility to design your ontology and instructions tailored to your use case

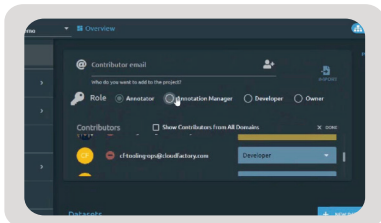

AUTOMATED, AI-POWERED LABELING

- AI-powered features and automation help speed the labeling process
- Pre-labeling data for verification increases the annotation team's productivity
- Hourly pricing means you benefit financially from our analyst's efficiency and productivity

POWERFUL DATA MANAGEMENT

- Flexible data set and directory structure for organizing, searching, and filtering project workflows
- Unique data label ontology to ensure consistency across your data sets
- Optional data security with cloud storage providers such as AWS S3 and Google Cloud

ENTERPRISE-GRADE DATA OPERATIONS

- Enterprise grade data security
- Custom authentication, role permission enforcement, and full data encryption
- High performance and uptime for sustained, large-volume data labeling projects

EFFICIENT WORKFLOW MANAGEMENT

- Optimized workflow processes and technology reduce project management overhead
- Efficient task assignment and routing speed annotations and lower costs
- Edge case inspection and routing to your internal team increases accuracy
