

Dataloop

Vision AI, Image & Video
Annotation Platform, Automation,
Data Ops & Data Pipelines

Founded: 2017

HQ Location: Israel

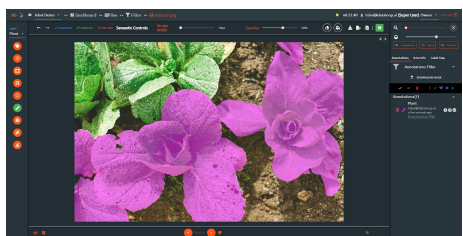

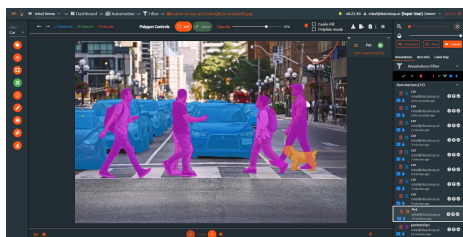

Principals:

Eran Shlomo, CEO/CTO

Avi Yashar, Chief Product Officer

Nir Buschi, Chief Business Officer

Company Size: 12 employees

EXECUTIVE SUMMARY

Dataloop provides an end-to-end enterprise grade deep learning data centric platform that accelerates the development of vision AI solutions and supports AI in production environments with human-in-the-loop.

The Dataloop platform excels with high volume, high variance and complex data. Is used by enterprises building various solutions such as autonomous machines, smart retail, self driving, drones and precision agriculture.

BENEFITS

Entire data teams within your enterprise are supported with state-of-the-art data preparation tools, robust data management, data QA & validation for ensuring data quality and purity, developer tools such as APIs and SDK for applying automation and building custom data pipelines. All fully integrated with CloudFactory's data labeling workforce. With Dataloop, organizations are proving to boost the data annotation process and are increasing productivity dramatically.
