Purchase price:

## EXECUTIVE SUMMARY

Datasaur tackles numerous natural language processing (NLP) tasks in a team enabled environment that significantly increases data quality and throughput by 70%.

Datasaur leverages predefined templates, auto-labeling (spaCy), modular extensions, and advanced collaboration techniques to scale your growing NLP and Transcription needs.

## BENEFITS

Robust and intuitive user interface allows multiple team members to tackle the following and more:

- **NER** - Identify and extract key entities for automated content discovery.
- **POS** - Tag parts of speech for individual words.
- **Conference Resolution** - Find all expressions that refer to the same entity in a text.
- **Dependency Resolution** - Break down the grammatical structure of a sentence.
- **Document Labeling** - Categorize and classify data.
- **Transcription** - Extract pre-defined information from documents.

*"I can't imagine going back to managing my labeling team without Datasaur."*
