V7 Labs (Darwin)

Image & video annotation.
Auto-annotation. Active Learning.
Dataset Management.
Neural Network Training.

Founded: 2018
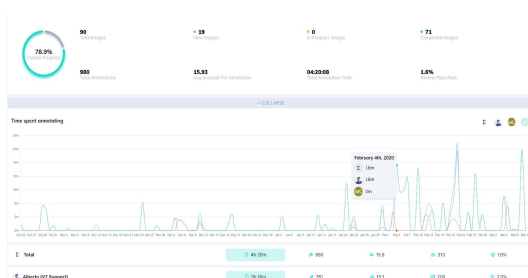

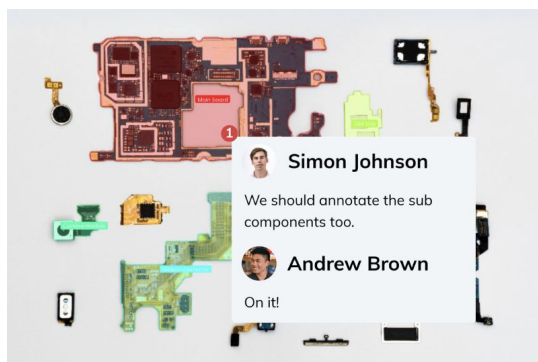

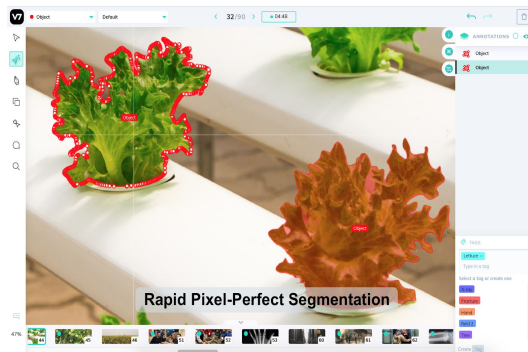

HQ Location: United Kingdom

Principals:

Alberto Rizzoli, CEO

Simon Edwardsson, CTO

Company Size: 10 Employees

Rapid Pixel-Perfect Segmentation

EXECUTIVE SUMMARY

Save time and increase accuracy! V7 Darwin leverages automation to create pixel perfect ground truth for neural networks 10x faster than traditional tools.

With support for medical images and large-scale data, Darwin is an intuitive and powerful toolkit many industry experts rely on to meet strict compliance and compatibility standards.

BENEFITS

Robust dataset management gives your teams a distinct industry advantage providing them the ability to readily track and reference pertinent information:

- Diverse data formats accepted
- Data versioning
- Collaboration
- Custom workflows
- Track annotation progress
- Troubleshoot model performance by class representation and instance frequency
- Advanced search and filter

When paired with workforce management and auto annotation features, ground-truth training is achieved in record time.
